## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 6, drawn to judging abnormality of the speed changer by comparing the learn value with a range, classified in class 702, subclass 62.
  - II. Claims 2-4, drawn to judging abnormality of the speed changer by judging convergence status of the change of the learned value, classified in class 702, subclass 180.
  - III. Claims 5, drawn to judging abnormality of the speed changer according to non-convergence status of the change of the learned value, classified in class 702, subclass 179.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention groups II and III has separate utility such as predicting abnormality of the speed changer based on the statistic of the change of the learn value. See MPEP § 806.05(d).

Art Unit: 3661

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
